

The Norwegian Academy of Science and Letters  
announces the

CALL FOR NOMINATIONS 2014

# THE KAVLI PRIZE

For outstanding scientific research in

ASTROPHYSICS • NANOSCIENCE • NEUROSCIENCE

**Nomination deadline: December 1, 2013**

Nominations will be reviewed by committees of  
leading international scientists appointed by

The Norwegian Academy of Science and Letters  
based on recommendations by

The Chinese Academy of Sciences  
The French Academy of Sciences  
The Max Planck Society (Germany)  
The National Academy of Sciences (US)  
The Royal Society (UK)

The Kavli Prize will be awarded in Oslo in September 2014  
and will consist of

A gold medal • US \$1,000,000 • A scroll

For details about the nomination process see

## TENURE-TRACK FACULTY POSITIONS IN ALCOHOL RESEARCH, BINGHAMTON UNIVERSITY

Binghamton University is undergoing an unparalleled hiring initiative that will lead to a 25% increase in tenure-track faculty over the course of 5 years. Many of these hires will be affiliated with targeted expansion of selected research areas in the health sciences. Commensurate with the University's commitment to expand alcohol research within this broader health sciences initiative, the Department of Psychology at **Binghamton University (SUNY)** invites applications for two tenure-track alcohol researchers to join the Behavioral Neuroscience program. One position is for a well-established distinguished alcohol researcher to join our faculty as a tenured full (or potentially associate) professor. This individual should have developmental interests, an impressive record of research productivity and funding, and expertise in teaching and administrative activities. The second hire is expected to be a tenure track assistant professor with a strong background of research, training, and teaching in the area of alcohol and neuroscience. Successful individuals will have research interests that complement and extend ongoing research of the Developmental Exposure Alcohol Research Center (DEARC), a NIAAA-funded alcohol research center (see website at <http://www.binghamton.edu/dearc/>). Areas of specialization within the alcohol field are open, although alcohol researchers with experience in developmental and adolescent neuroscience are particularly encouraged to apply. In addition to a strong interest in joining our highly collaborative and dynamic group of alcohol researchers, the successful candidate will be expected to contribute to undergraduate and graduate teaching in our department.

The Department provides a very supportive research environment with excellent resources and an environment strongly conducive to research. Laboratory space is also exceptional, with the laboratories of Behavioral Neuroscience faculty located in a new, 40,400 sq. foot, state-of-the-art animal research building. More information about the department is available at <http://www2.binghamton.edu/psychology>. Confidential queries about these positions can be directed to Linda Spear, Ph.D., chair of the search committee ([lspear@binghamton.edu](mailto:lspear@binghamton.edu)).

Send a curriculum vita and statement of research and teaching interests either: 1) By email to Ms. Gina Fleming, [gflaming@binghamton.edu](mailto:gflaming@binghamton.edu), or 2) via hard copy to Alcohol Faculty Search Committee, Department of Psychology, Binghamton University (SUNY), P.O. Box 6000, Binghamton, NY 13902-6000. Applications will be reviewed as received. Binghamton University is an Equal Opportunity/Affirmative Action Employer.

## The #1 Cited Journal in Neuroscience\*

Read *The Journal of Neuroscience* every week to keep up on what's happening in the field.

- The number one cited journal in neuroscience
- The most neuroscience articles published each year—nearly 1,800 in 2011
- Impact factor 7.12
- Published 50 times a year

# NO MORE INJECTIONS

**Simplify your research with automatic and continuous dosing.**

ALZET® Osmotic Pumps are a superior alternative to repetitive injections and other dosing methods that require frequent animal handling. These fully implantable pumps provide continuous and precise administration of test agents, in animals as small as mice, for up to 6 weeks. ALZET pumps are economical and easy to use by lab personnel. Learn more at [alzet.com](http://alzet.com)
